DEG cluster 1

GO term	Category	Count	-log10 adjusted p-value
small molecule metabolic process	Biological process	60	~3
chitin-based cuticle development	Biological process	20	~2
mitotic cell cycle	Biological process	40	~2
carboxylic acid metabolic process	Biological process	40	~2
spindle midzone	Cellular component	20	~4
extracellular region	Cellular component	40	~3
spindle	Cellular component	20	~3
chromosome, centromeric region	Cellular component	20	~1
oxidoreductase activity	Molecular function	60	~4
structural constituent of chitin-based cuticle	Molecular function	20	~3
structural constituent of cuticle	Molecular function	20	~3
structural constituent of chitin-based larval cuticle	Molecular function	20	~3

DEG cluster 2

GO term	Category	Count	-log10 adjusted p-value
peptidoglycan metabolic process	Biological process	20	~6
peptidoglycan catabolic process	Biological process	20	~6
aminoglycan catabolic process	Biological process	20	~6
response to bacterium	Biological process	20	~5
extracellular region	Cellular component	60	~6
plasma membrane	Cellular component	40	~5
cell periphery	Cellular component	40	~4
extracellular space	Cellular component	20	~3
peptidoglycan binding	Molecular function	20	~6
glycosaminoglycan binding	Molecular function	20	~6
carbohydrate derivative binding	Molecular function	20	~4
transmembrane transporter activity	Molecular function	40	~3

Cluster genes in term ● 20 ● 40 ● 60

GO ontology ● Biological process ● Cellular component ● Molecular function
