

DEG cluster 1

DEG cluster 2

Metabolic pathways
Pentose and glucuronate interconversions
Cell cycle
Cell cycle – yeast
Drug metabolism – cytochrome P450
Biosynthesis of secondary metabolites
Metabolism of xenobiotics by cytochrome P450
Insect hormone biosynthesis

Hedgehog signaling pathway – fly
Neuroactive ligand–receptor interaction
Toll and Imd signaling pathway

-log10 adjusted p-value

Cluster genes in pathway ● 25 ● 50 ● 75
